
	<p>Dr Peter Wick</p>		
<p>Organisation</p>	<p>Empa</p>		
	<p>Dr. Peter Wick is head of the laboratory for Particles-Biology Interactions. He is expert in cellular and molecular biology. His general research interest is to study the interactions of nanoproducts with human barrier tissues <i>in vitro</i> and <i>ex vivo</i> with the purpose to obtain detailed mechanistic information about their uptake, transport effect on different types of cells or entire tissue. In addition he is interested in improvement of currently used acute toxicological test methods to obtain reliable and robust results.</p>		
<p>Role in the EU-NCL</p>	<p>Peter is member of the Executive Board</p>
